

Fig. 1 is a schematic cross-sectional view of a large industrial vessel, likely a reactor or separator. The vessel has a cylindrical body with a conical bottom. Inside, there is a central vertical column (50) and a horizontal pipe (20) with a funnel-shaped component (24) attached. The vessel is supported by a base (5) and has various access points (3, 4) and structural elements (12, 30, 32, 34, 42, 44, 46, 48, 52, 54) labeled.
